

LISTINGS WITH PHOTOS

When selling your collectibles on TCGplayer.com, you can easily add your own photos to your listings. This helps you sell high-value and unique items like graded collectibles, signed cards and Funko Pop!, miscuts, misprints, and card alters. All sellers on the TCGplayer Marketplace have access to this feature. (Want more info about listings with photos? Visit our [seller website](#) to learn more.)

Policies and Best Practices

Before you get started, it's a good idea to familiarize yourself with our [listings with photos policies](#) and [best practices](#). Plus, make sure to take a look at our [FAQ](#) for answers to some popular questions we've received.

Some important things to keep in mind:

- All listings with photos need to be (or have originally been) the official, manufactured item you're listing. For example, a signed or altered Tarmogoyf is okay, but a proxy or counterfeit Tarmogoyf is not.
- You may list playsets as long as all cards are the same version, but you may not list card lots.
- All photos have to be of the exact product you have in your possession. You may not use stock images or photos of a similar product.
- Make sure to keep it clean. Any photos deemed inappropriate (containing sexually explicit, racist, or excessively violent text or images) will be removed. Note: Any original artwork provided by the manufacturer is acceptable, and we will not remove or censor it in any way.

Adding Your Listings with Photos

You can use either the Inventory tab (all sellers) or the Pricing tab (Level 4 only) to add photos. Follow these simple steps to add your listings using the Inventory tab. For more detailed instructions for both the Inventory and Pricing tabs, refer to [How to Add Listings with Photos](#).

1. Within the Inventory tab, search for the product you want to create a listing for and click the Add/Manage button.
